Term Assignment – Research Proposal
Due: Monday, April 24

Write a two page description of the research that you will do this quarter to fulfill the requirement of Soc. 256. This should be a piece of demographic research that makes some use of the ideas and/or techniques covered in the class. Make some use of either macro or microsimulation, even if it amounts to an application of relatively straightforward demographic decomposition methods.

On Monday, June 13, 2006, a progress report on this research is due. This can be a working paper, chapter, or extended memo on your results. We understand that people's projects vary greatly in their current stages of development. What we want to see this quarter is some progress on whatever your research happens to be.

We would be happy to meet with you face to face to discuss ways of connecting your research to the subject matter of this class.
